PixLab Unveils New eKYC Platform with Unmatched Global ID Document Support

ekyc.pixlab.io

PixLab, a leading provider of advanced image and video analysis solutions, is thrilled to announce the launch of its revolutionary **eKYC platform**, a game-changing solution for developers designed to streamline and enhance Know Your Customer (KYC) processes.

This state-of-the-art platform introduces **DOCSCAN**, a powerful REST API endpoint capable of scanning and processing over 11,000 types of ID documents from more than 197 countries, both with and without Machine Readable Zones (MRZ).

11097+ 197 86+

ID DOCUMENTS

COUNTRIES

MILLIONS OF API CALLS
EACH MONTH

Unprecedented Global Coverage and Capabilities

The new [eKYC platform](#) by PixLab stands out in the market due to its comprehensive support for a vast array of officially issued ID documents, including passports, ID cards, driver's licenses, visas, and birth/death certificates. No other KYC platform has achieved such a milestone, making [DOCSCAN](#) an unparalleled tool for organizations needing robust and reliable ID verification solutions.

Key Features and Benefits:

1. **Extensive Document Support:** [DOCSCAN](#) can process over 11,000 types of ID documents from more than 197 countries, ensuring broad and versatile coverage.
2. **Single REST API Endpoint:** Simplifies integration and reduces development time by providing a single endpoint for all ID scanning and processing needs.
3. **Advanced Data Extraction:** Automatically extracts essential details such as full name, ID number, date of birth, and address, along with automatic face detection and cropping.
4. **Seamless Integration:** Comprehensive documentation and code samples available in multiple programming languages ensure easy and quick adoption.
5. **High Volume Processing:** Built on a scalable architecture capable of handling millions of API calls monthly, making it ideal for enterprises and large organizations.

Customer Testimonials:

- "The versatility of the [DOCSCAN RESTful API](#) made it perfectly fit into our diverse tech stack. It's reliable and incredibly easy to use for our KYC purposes."
- Priya, Software Engineer at Daisy Tech

- *"Using DOCSCAN transformed how we handle document verification. The API's robustness and the detailed code examples provided made it simple to enhance our customer onboarding process."* - Hanna, System Architect at Mirobytes Software

About PixLab:

[PixLab](#) is a leading provider of cutting-edge technology solutions designed to enhance digital security and streamline identity verification processes. Our mission is to provide businesses with reliable, efficient, and easy-to-integrate tools that support compliance and improve user experiences across various industries.

For more information about PixLab's new eKYC platform and to get started with DOCSCAN, visit our [eKYC API page](#) and explore the [DOCSCAN API documentation](#). Obtain your first API key from the [PixLab Console](#) and elevate your compliance efficiency today.
